

Europa Aircraft - the Plane with added panache!

Europa XS isn't just a market leader because it offers superlative performance, low running costs and genuine '3 plane in 1' adaptability; the added style and panache of the Europa models gives them a wow factor not matched by any other light aircraft.

The Europa XS is a fabulous plane, no other self build on the market compares to its elegance, agility and style.

The finishing touches

No two Europa's are the same, and no other plane of its type offers its distinctive elegance. Whether you want to build your own Europa kit plane or chose the certified version, the appeal of the Europa is the choice available when it comes to making your own mark and individualising your plane.

It's not just the chosen model, modifications and engine type that gives your plane its uniqueness, but the finishing touches that sets the plane apart from each other and indeed other planes on the market.

Whether you choose the certified Europa or self build option, your plane can be customised however you want it. So, if you want luxury leather and carbon fibre interior, a Speed Kit to enhance the aerodynamics or a little extra space, Europa can offer any combination.

Speed Kit

One of the most popular modifications is the Europa Speed Kit.

For the Monowheel this kit provides a possible 9kt increase in speed and includes flap hinge, outrigger mechanism, wheel fairings and tailwheel fairings. The Tri-gear Speed Kit offers a 10kt speed increase and includes wheel, flap hinge, and leg fairings.

Key Features:

- Exceptional economy
- Ultra quiet
- Generous useful load
- Established company
- Europa community worldwide
- Fantastic service and support
- Runs on Mogas
- Stores on a trailer
- Choice – available as a kit plane or certified aircraft (CS-VLA, CS-22)
- Diversity – one plane, three flight experiences

Size modifications

At Europa we obviously know that no two people are the same; we all come in different shapes and sizes. This is the reason our other modifications include extensions.

Both Europa models have high top and width extension modifications, which help to make your plane perfect for each individual pilot.

There are many more modifications available – performance and aesthetic enhancing. Please visit the website, or contact Europa for more details:

About the Europa XS

The Europa XS is a two seater side-by-side composite monoplane. It is fast and quick in the climb, comparatively economical to run, has a range and carrying capacity that makes it ideally suited to touring, and is designed to be quickly de-rigged and stored on a trailer in a garage.

One Plane, three flight experiences

The Europa XS Trigear is available with three wings: Sports Tourer, Motor Glider and LSA. All of the wings are fully interchangeable, providing a genuine three in one aircraft. Buy all three wings, and you can experience three different types of flight, all in the same plane.

Why Europa?

Europa was designed to be as user friendly and as flexible as possible; it isn't surprising that it has been described as a 'plane for all pilots', thanks to its ease of construction and superlative performance of the finished aircraft. With over 1000 Europa's sold to date, it is one of the most innovative light aircraft available with many pilots singing its praises World Wide. Don't just take our word for it – fly a Europa and you'll find no other aircraft of its type will compare!
